SOFTWARE ENGINEER

Build and ship production web applications end-to-end. Developed an LMS and a government platform currently serving real users. Built a book tracking app solo (backend, mobile, web) and a learning center CRM with Playwright E2E test coverage. Write and maintain automated tests with Playwright, Jest, and PHPUnit across multiple projects. Stack: Laravel, Django, React, React Native, Node.js, PostgreSQL, Docker.

CORE STACK

Testing: PHPUnit/Pest · Playwright · Jest · Postman

Backend: Laravel · PHP · Django · Python · Node.js · PostgreSQL · MySQL · Nginx · REST APIs

Frontend & Mobile: React · React Native (Expo) · TypeScript · JavaScript · HTML/CSS

ML & Data: Scikit-learn · Pandas · NumPy · Seaborn · Streamlit

DevOps & Tools: Git · GitLab · GitHub · Docker · GCP · Minio

AI Tools: Claude Code · GitHub Copilot · Codex · Cursor

PROFESSIONAL EXPERIENCE

ML Engineering Intern · FlyRank AI

Summer 2026

- **Worked on production ML pipelines** in a remote engineering team, participating in code reviews and collaborative ML engineering workflows.

PHP / Laravel Backend Developer · Simplex IT Company

Dec 2025 — Present

- **Building backend for a Learning Management System** used in production, serving web and mobile clients through RESTful APIs with Laravel and PostgreSQL.
- **Developing the Green Economy Platform** for government use, implementing modular backend architecture with role-based access control.
- **Promoted from 3-month intern to permanent role** after demonstrating ownership of features, participating in code reviews, and shipping production-ready code using Git and GitLab workflows.

PROJECTS

Temurbekschool CRM · Learning Center Management (Team of 3)

2025

- **Built the frontend for a learning center CRM** with React and TypeScript — attendance tracking, payment management, and class scheduling UI that replaced manual notebook records and improved center productivity by ~50%.
- **Wrote Playwright E2E tests** covering student registration, attendance marking, and payment flows to catch regressions before each release.

Kitobon · Book Tracking App (Founder)

In Production

- **Built a full-stack reading library app solo** — Laravel REST API, React Native (Expo) mobile client, and React web frontend, currently in production with real users.
- **Covered critical backend flows with PHPUnit/Pest tests** for auth, library CRUD, reading sessions, and statistics endpoints to prevent regressions across releases.
- **Designed and shipped the full feature set solo** — reading sessions with timer, streak tracking, statistics with heatmap, book import from Google Books and OpenLibrary, and data export — from database schema to mobile UI.

- **Built the frontend for a sales and inventory platform** with React, TypeScript, and MUI — role-based dashboards, product tracking, profit margin reporting, and automated finance views that improved sales productivity by ~60%.
- **Wrote component tests with Jest** for frontend modules covering sales workflows, reporting views, and branch-based statistics.

Onatlim LMS · Vatandoshlar Fondi

2025

- **Developed an Uzbek language learning platform** for the diaspora community with lesson management, student progress tracking, and media delivery via Minio (S3-compatible) object storage.

Quran Recitation Recognizer · ML Research

Research

- **Developed an ML-powered audio recognition system** to identify Quran recitation using Scikit-learn, Pandas, and feature extraction pipelines. Deployed via Streamlit.

EARLIER EXPERIENCE

Safar Travel (Freelance, 2024) — Frontend developer on internal dashboard; built Telegram bot for generating hotel images using React, WebSocket, and HTML/CSS.

EDUCATION & LANGUAGES

B.Sc. Computer Science, Millat Umidi University, Tashkent (Oct 2023 — Present)

Academic Lyceum of Westminster International University — Graduated with High Honors, GPA 3.9/4.0 (Sep 2021 — Jul 2023)

Languages: Uzbek · Russian · English

Awards: Regional Participant, Kokand Math Olympiad · Ibrat Language Camp "Top 100 Universities" 2nd season · Build with AI: EdTech Hackathon (SQB x NUU, May 2026)
